## Product Description

---

The KAKU KA1525HA2 is a premium industrial cooling component designed for durability and high performance. Engineered with a robust ball bearing system, this AC axial fan ensures reliable airflow and operation stability. Its construction features specialized protection against high temperatures and moisture, making it an excellent choice for maintaining optimal thermal conditions in demanding environments.

Manufacturer: KAKU

Model Number: KA1525HA2

Product Type: AC Axial Fan

Rated Voltage: 220 V

Rated Current: 0.25 A / 0.23 A

Bearing Type: Ball Bearing

Series Code: 1525

Protection Features: Waterproof, High Temperature Resistant

Condition: New Original

Application: Industrial Cabinet Cooling

Optimized for rigorous usage, the KA1525HA2 is widely applied in industrial automation control cabinets, power distribution units, and server enclosures. Its waterproof and high-temperature resistant capabilities allow it to function effectively in harsh manufacturing floors or outdoor

equipment scenarios where standard cooling solutions would fail, thereby safeguarding sensitive electronics from thermal damage.
