## Product Description

---

The Protechnic MGA4005HS-O10 is a specialized DC cooling fan engineered for reliability in compact electronic applications. Operating at 5V with a current draw of 0.25A, this unit utilizes high-quality double ball bearings to deliver consistent high airflow and prolonged operational life. Its robust construction ensures stable rotation and vibration resistance, making it a dependable solution for equipment requiring continuous thermal management via a standard 2-wire interface.

Model Number: MGA4005HS-O10

Brand: Protechnic (Magic)

Product Type: DC Axial Fan

Rated Voltage: 5V

Rated Current: 0.25A

Power Consumption: 1.25W

Bearing Type: Double Ball Bearing

Termination: 2-Wire

Mounting Style: Flange Mount

Condition: New, Original

Application Area: Industrial & Consumer Electronics

Designed for critical thermal regulation, this fan serves as an essential component in maintaining the functionality of precision devices. It is specifically optimized for heat dissipation in laser lighting

modules and humidifiers, where space is limited but airflow demand is high. The Protechnic MGA4005HS-O10 effectively prevents thermal throttling in these specific applications, ensuring the longevity and safe operation of the host equipment through efficient, steady cooling.
