

MMF-09D24TS-RM1 Mitsubishi 24VDC 92mm 3-Wire Axial Fan Datasheet

Brand: Mitsubishi

SKU: [929333690704](#)

Category: Axial & Centrifugal Fans

Price: **\$30.99**

E-mail: sales@equipspares.com

Web: <https://www.equipspares.com>

Product Description

The Mitsubishi MMF-09D24TS-RM1 is a precision-engineered DC axial fan designed for high-reliability industrial cooling applications. Featuring a robust motor architecture and durable bearing system, this unit ensures optimal thermal impedance management within demanding environments. Its aerodynamic blade design balances airflow efficiency with structural rigidity, making it an ideal solution for maintaining operational stability in variable frequency drives and power electronics.

Model Number: MMF-09D24TS-RM1

Brand: Mitsubishi

Product Type: Axial Fan

OEM Part Number: CA1322-H01

Rated Voltage: 24VDC

Rated Current: 0.19 A

Power: 4.56 W

Dimensions: 92 x 92 x 25 mm

Termination: 3-Wire Lead Wires

Bearing Type: Ball Bearing

Application: Inverter Cooling

Condition: New Pull / OEM Replacement

Designed specifically for thermal management in industrial automation, the MMF-09D24TS-RM1 is

essential for the reliable operation of Mitsubishi variable frequency drives and inverters. This cooling component prevents overheating in server racks, CNC machinery control panels, and power supply units where consistent airflow is critical. By integrating the MMF-09D24TS-RM1, maintenance teams ensure prolonged equipment lifespan and reduced downtime in mission-critical manufacturing and telecom infrastructure.
