Product Description

The Pentawave PF-K6BS is a high-performance DC axial fan designed for robust thermal management in compact electronic environments. Featuring a standard 6025 form factor, this unit operates at a rated voltage of 12V with a current draw of 0.35A, delivering a high rotational speed of 5500RPM. Engineered for reliability and efficiency, it utilizes a durable 2-wire interface, making it an excellent choice for replacing stock fans or integrating into new industrial cooling systems requiring consistent airflow.

Brand: Pentawave

Model: PF-K6BS

Product Type: DC Axial Cooling Fan

Rated Voltage: 12V

Rated Current: 0.35A

Rated Speed: 5500RPM

Dimensions: 60 x 60 x 25 mm

Termination: 2-Wire Lead

Connector Type: 2-Pin / Bare Wire Interface

Condition: New, Original

Housing Material: Thermoplastic PBT (UL94V-0)

Impeller Material: Thermoplastic PBT (UL94V-0)

Mounting Style: Flange Mount

Application Category: Industrial/Electronic Cooling

Designed to meet the rigorous demands of active cooling, the Pentawave PF-K6BS is specifically suited for heat dissipation in computer chassis, server power supply units, and industrial power inverters. The high-speed 5500RPM motor ensures sufficient static pressure to force air through dense components, effectively mitigating thermal throttling in continuous-duty equipment. Its standard sizing allows for seamless retrofitting into existing hardware setups that require the specific performance profile of the PF-K6BS.
