## Product Description

---

The JiuLong TG22580HA6B is a robust Axial Fan designed for high-demand industrial environments. Engineered with a precision AC motor and durable ball bearing architecture, this unit ensures optimal airflow efficiency and reduced thermal impedance. Its aerodynamic blade design maximizes static pressure while maintaining structural rigidity, making it an ideal solution for critical cooling applications requiring consistent performance and longevity.

Model Number: TG22580HA6B

Brand: JiuLong

Product Type: Axial Fan

Rated Voltage: 380 VAC

Rated Current: 0.32 A

Power: 80 W

Dimensions: 225 x 225 x 80 mm

Bearing Type: Ball Bearing

Frame Material: Die-cast Aluminum

Mounting Type: Flange Mount

Application: Welding Machine Cooling

Condition: New

The TG22580HA6B is specifically engineered for rigorous industrial applications, including heavy-

---

duty welding machines and power distribution cabinets. Its high-voltage capability makes the TG22580HA6B suitable for factory automation equipment and large-scale ventilation systems where reliable thermal management is essential for preventing component failure.
