## Product Description

---

The NMB 06015SS-24P-AL-02 is a precision-engineered DC Axial Fan designed for high-reliability thermal management in industrial and computing environments. Featuring MinebeaMitsumi's advanced motor technology, this unit delivers exceptional airflow efficiency while maintaining structural rigidity under continuous operation. The aerodynamic impeller design is optimized to reduce turbulence and lower thermal impedance within dense electronic enclosures. Engineered for longevity, the internal bearing architecture ensures stable rotation and minimal friction, making it a robust solution for critical cooling applications requiring consistent performance at 24VDC.

Model Number: 06015SS-24P-AL-02

Brand: NMB (MinebeaMitsumi)

Product Type: DC Axial Fan

Rated Voltage: 24VDC

Operating Voltage Range: 14.0 - 27.6 VDC

Rated Current: 0.17 A

Input Power: 4.08 W

Dimensions: 60 x 60 x 15 mm

Bearing Type: Precision Ball Bearing

Termination: 3-Wire with Connector

Sensor Type: Tachometer / Speed Signal

Housing Material: PBT Plastic (UL94V-0)

Impeller Material: PBT Plastic (UL94V-0)

Mounting Orientation: Any

Ingress Protection: IP20

Operating Temperature: -10°C to +70°C

Application: Server / Industrial / Telecom

Condition: Original New

The 06015SS-24P-AL-02 is widely utilized in compact electronic assemblies such as 1U server chassis, telecommunications switching equipment, and industrial power supply units. Due to its slim 15mm profile, the 06015SS-24P-AL-02 is particularly effective in space-constrained environments where efficient heat dissipation is critical for component longevity and system stability.
